COURSEWORK / SKILLS

- OOPS Concept
- Web Development

PROJECTS

Expense Management Web Application

- Developed a web application for managing personal expenses using Java Servlet, JSP, and JDBC.
- Implemented CRUD functionality for managing expense records, including creating, reading, updating, and deleting expenses.
- Utilized Java Servlets to handle HTTP requests and responses, JSP for dynamic web content generation, and JDBC for database connectivity.
- Integrated local storage to persist user data across sessions and ensure data consistency.

IPL Winner Predictor App Using Machine Learning

- Built a machine learning model to predict the winner of IPL matches using Python and Scikit-learn.
- Utilized pandas for data preprocessing and Matplotlib/Seaborn for data visualization.
- Deployed the application using Streamlit for an interactive user interface.

Sentiment Analysis Of Top Engineering Colleges In Maharashtra

- Conducted sentiment analysis on reviews and feedback of top engineering colleges in Maharashtra using Python and NLP techniques.
- Extracted and processed data using web scraping tools and libraries.
- Visualized sentiment trends using Matplotlib and Seaborn.
